

24-port network patch panel with 6 ports

AI Overview

24-port patch panels with 6-port modular sections offer flexible, high-performance network management for Cat6 and Cat6A installations. Overview A 24-port patch panel with 6-port modules is designed to divide the panel into four removable or modular sections, each containing 6 ports. This modularity allows for easier installation, maintenance, and upgrades without disturbing the entire panel. These panels are typically 1U rack-mountable, though some slim designs are available at 0.5U for space-saving applications. Key Features Modular 6-Port Sections: Each 6-port module can be removed or replaced independently, simplifying cable management and reducing downtime during maintenance. Cat6/Cat6A Compatibility: Supports high-speed networks up to 10Gbps, ensuring reliable signal flow and compliance with structured cabling standards. Wiring Standards: Universal T568A/B wiring is supported, making the panels compatible with most network installations. Termination Options: Panels support 110 or Krone punch-down tools, allowing for quick and accurate cable connections. Cable Management: Many models include removable cable management bars or optional rear cable managers to keep cables organized and reduce clutter. Durability: Constructed with high-quality materials such as anodized aluminum frames, SPCC steel brackets, and gold-plated contacts for reliable connectivity and long-term use. Benefits Ease of Installation: Modular design allows technicians to work on individual sections without disconnecting the entire panel. Scalability: Additional modules or keystone jacks can be added as network needs grow. Space Efficiency: Slim 0.5U or standard 1U designs fit standard 19-inch racks while maximizing port density. High Performance: Supports advanced applications like PoE, HDBaseT, and high-speed data transmission. Examples Legrand TechChoice 24-Port Cat6 Patch Panel: 1U, six-port modular, universal T568A/B wiring, easy termination with 110-impact tool. Everest 24-Port Cat6/6A Modular Patch Pane...
