

## Affordable price of polymer cable trays

### AI Overview

Polymer cable trays typically cost between \$308 per meter for high-end polymer alloy types and \$15–\$50 per meter for standard FRP or PVC trays, depending on size, type, and supplier. Price Range and Factors Polymer cable trays are generally more expensive than basic steel or aluminum trays due to their corrosion resistance, lightweight construction, and non-conductive properties. Prices vary based on:

- Material type: Standard FRP or PVC trays are more affordable, while polymer alloy or fire-retardant trays are at the higher end of the price spectrum.
- Tray size and thickness: Wider or thicker trays designed for heavy cable loads cost more.
- Design complexity: Solid, hollow, or steel-lined trays have different manufacturing costs, with steel-lined trays being more expensive due to added strength.
- Order quantity: Bulk orders often reduce the per-meter cost, while small orders may be priced higher.
- Supplier and origin: Chinese manufacturers often offer competitive FOB prices ranging from \$15 to \$308 per meter depending on specifications.

Typical Applications Polymer trays are ideal for chemical plants, water treatment facilities, data centers, hospitals, and outdoor installations due to their resistance to corrosion, UV radiation, and chemicals, as well as their non-conductive nature. Hollow trays are commonly used in offices and commercial buildings for lighter cable loads, while solid or steel-lined trays are preferred in heavy industrial environments.

Summary Low-end polymer trays (PVC/FRP): \$15–\$50 per meter High-end polymer alloy trays: ~\$308 per meter Factors affecting price: material, size, type, load capacity, installation complexity, and supplier location. For accurate pricing, it is recommended to request quotes from suppliers specifying tray type, dimensions, and quantity, as prices can fluctuate based on material costs and shipping considerations.
