

## **Argentine photovoltaic cable tray manufacturer**

### **AI Overview**

CME Argentina, Brilltech Engineers, and Cable House are notable manufacturers of cable trays in Argentina suitable for photovoltaic installations. Key Manufacturers and Products

**CME Argentina – Escaglass® Cable Trays** CME Argentina produces fiberglass-reinforced composite (GFRP) cable trays through a pultrusion process, offering excellent mechanical strength, UV resistance, and corrosion resistance, making them ideal for outdoor photovoltaic systems. Their trays are lightweight (7–16 kg per 3 meters), maintenance-free, and comply with NEMA FG-1, UL non-metallic standards, and NEC guidelines. They offer various resin types (polyester isophthalic, vinylester, or special resins) to suit different environmental conditions, including acidic, alkaline, or saline environments.

**Brilltech Engineers** Brilltech Engineers supplies galvanized steel, stainless steel, and fiberglass cable trays in Argentina. Their products are designed for durability, enhanced airflow, and easy installation, which is critical for solar PV projects where cable overheating must be minimized. They provide technical support for system design and installation, ensuring compliance with industry standards.

**Cable House** Cable House manufactures and supplies a wide range of cable trays, including customized solutions for industrial and photovoltaic applications. Their products are recognized for high durability, reliable performance, and long service life. They also offer related accessories like cable ties and connectors, which are often required in solar installations.

**Considerations for Photovoltaic Applications**

**Material Choice:** Fiberglass-reinforced trays (GFRP) are preferred for outdoor PV systems due to corrosion resistance and UV stability. Stainless steel or galvanized steel trays are also used depending on environmental exposure.

**Standards Compliance:** Look for trays meeting NEMA, UL, and NEC standa...
