

Australian Overseas Warehouse Optical Receiver QSFP28

AI Overview

QSFP28 optical receivers are available from multiple Australian suppliers with local warehouse stock, offering fast delivery, compatibility guarantees, and technical support. Local Suppliers and Availability FS Australia offers the 100GBASE-ESR4 QSFP28 Optical Transceiver, supporting 100G Ethernet over OM3 (up to 200m) or OM4 (up to 300m) multimode fiber at 850nm via MTP/MPO-12 connectors. It is compliant with IEEE 802.3bm 100GBASE-SR4 and CAUI-4 standards, with digital diagnostics via I2C for real-time monitoring. FS provides a lifetime warranty and ISO/IEC 27001 compliance for information security management. Rapid Optics supplies vendor-compatible QSFP28 modules with a three-year Australian warranty, compatibility guarantee, and express delivery. They also provide SFP, SFP+, SFP28, XFP, QSFP+, and QSFP28 transceivers suitable for data centers and networking applications. Fiber2C operates a branch in Melbourne to serve the Australian market, offering a wide range of optical transceivers including 100G QSFP28, 200G QSFP56, 400G QSFP-DD, and 800G OSFP modules. They provide 24/7 local technical support, compatibility testing, and high-quality products at competitive prices, often up to 70% savings compared to OEMs. QSFPTEK provides solutions for high-performance networks, including AI clusters and HPC environments. While their main warehouses are in the US and EU, they offer engineer support and tailored networking solutions, which may be relevant for Australian customers seeking overseas stock with fast shipping. Technical Considerations QSFP28 modules typically support 100G Ethernet and are hot-swappable. Ensure receive optical power is within safe limits (less than -4 dBm) to prevent module damage, especially when connecting to WDM devices or short-distance links. Modules are compatible with multiple vendors, but checking s...
