

Bahrain-made primary distribution box

AI Overview

Primary distribution boxes in Bahrain are available from local manufacturers like Ascon Control WLL, international brands such as Panasonic, and online suppliers, designed to meet GCC climate and safety standards.

Overview A primary distribution box (DB) is a critical component in electrical systems, serving as the main hub for distributing electricity from the main supply to various circuits. In Bahrain, these boxes are designed to withstand high temperatures, dust, and occasional sandstorms, ensuring reliable power distribution in residential, commercial, and industrial settings.

Local Manufacturers and Suppliers

- Ascon Control WLL:** One of Bahrain's leading manufacturers, offering a wide range of products including distribution boards, control panels, substations, sub-main switchboards, motor control centers, and junction boxes. They provide tailored solutions for both small-scale and large-scale projects.
- Qetaat.com:** An online platform where various distribution boxes can be purchased, with prices ranging from BHD 16.72 to BHD 162.80, depending on specifications and features.
- Panasonic:** Offers low-voltage distribution boxes with features like reversible doors, dust guards, door earthing, and integrated frame design for easy installation and enhanced safety.

Key Features to Consider

- Climate Resistance:** Boxes must endure temperatures above 50°C and resist dust and sand infiltration.
- Safety:** Shock-proof designs, door earthing, and proper insulation are essential to prevent electrical hazards.
- Flexibility:** Reversible doors and modular internal layouts allow easier installation and maintenance.
- Aesthetics:** Some modern DBs are designed to blend with interior decor, especially in residential or commercial spaces.

Installation and Support Local manufacturers and suppliers in Bahrain often provide installation guidance, maintenance training, and rapid repair services. This ensures compliance with both global electrical standards and local regulations, while also addressing the unique environmental challenges of the Gulf region.
