

Botswana upgrades fiber optic cable trenches

Overview

For the first time, northern Botswana has been linked directly to the Internet via fibre optic cable. This follows the completion by Liquid Intelligent Technologies of a fibre network extension from Ramatlabama to Ramokgwebana, a 730km independent network. Botswana telecommunications industry owes its success to the intrepid decision and visionary leadership which found it paramount to liberalize the telco sector to create a uniform environment for all players, culminating in the conception of Botswana Fibre Networks Ltd (BoFiNet). BoFiNet completed P100M network upgrades via citizen-owned companies, boosting Botswana's digital capacity and empowering local ICT companies through skills transfer. Botswana Fibre Networks (BoFiNet), a 100% Government-owned company, has recently completed two (2) strategic projects to expand its. Botswana Fibre Networks (BoFiNet) has successfully completed a major project aimed at providing high bandwidth capacity to customers across the country.
