

Cable tray support price in El Salvador

AI Overview

Standard cable tray supports in El Salvador typically range from \$10 to \$50 per unit, depending on material, size, and type. Overview Cable tray supports are essential for organizing and securing electrical cables in residential, commercial, and industrial installations. In El Salvador, suppliers such as Brilltech Engineers and Micro Sheet Crafts offer a variety of cable trays and supports made from galvanized steel, stainless steel, mild steel, PVC, and fiberglass . The choice of material significantly affects the price, with galvanized steel and PVC being more affordable, while stainless steel and fiberglass are generally more expensive due to durability and corrosion resistance. Typical Price Ranges Galvanized Steel Supports: \$10–\$25 per unit. These are widely used for standard installations and offer good durability at a moderate cost . PVC or Fiberglass Supports: \$15–\$30 per unit. These are lightweight, corrosion-resistant, and suitable for environments with high moisture or chemical exposure . Stainless Steel Supports: \$30–\$50 per unit. Ideal for industrial or outdoor applications where maximum corrosion resistance is required . Prices may vary based on size, load capacity, perforation type, and customization. For example, ladder-type or perforated cable trays with larger spans or higher load ratings will cost more than simple straight supports. Additional Considerations Bulk Orders: Suppliers often provide discounts for large quantities. Installation Services: Some manufacturers in El Salvador offer installation support, which may add to the overall cost. Local Availability: Prices can fluctuate depending on supplier stock, import costs, and material availability . For precise pricing, it is recommended to contact local suppliers directly with specifications such as tray width, support type, and material preference to obtain accurate quotes.
