

Cable trays from indoor to outdoor

Overview

The placement of cables, ducts, and conduits can be done using cable trays – for both outside plant (OSP) and interior spaces (ISP). MicroDucts were developed as a solution to house fiber cables that were smaller in size, but still carried significant capacity. Today, MicroCables range from 6 to 432-fiber. The PVC plastic cable trays produced by Canalplast have the advantage of being extremely versatile, since they can be installed on the wall, floor or hanging. Available in different sizes, with a standard length of 2 meters, our cable trays allow a perfect organization of the cables, respecting the. Heavy duty cable trays and cable ladders are manufactured from pre-galvanized or hot-dipped galvanized sheet metal, designed to meet ideal environmental working conditions for indoor and outdoor use in commercial or industrial environments with high cable density. These trays, meeting. Discover a comprehensive range of high-quality cable trays and cable ladders at ekabel24.com – the reliable choice for safe, organized, and standards-compliant routing of power, data, and control cables.
