

Cable trays lack protective covers

Overview

Improperly secured covers on outdoor cable trays can cause a serious safety hazard in high winds. In the majority of cases, covers are not used on cable trays for technical or safety reasons, but due to the “raceway complex,” a feeling by specifiers that cables must be totally. Cable tray covers may appear secondary in electrical system planning, but their influence on infrastructure integrity is undeniable. In practice, covers help minimize environmental exposure, maintain code compliance, and improve system lifespan. In this guide, we will walk through the different considerations that should guide your cable tray cover choosing process, and how. It is understood that cable trays in the construction of installation often encounter some site to install protective cover, but what is the specific situation?

Now let's see why the cable bridge should be protected. These essential components: Example: Stainless steel covers meet NEC 392.
