

Canadian cable tray lifespan

Overview

Lifespan (15-20 years): The cable tray lifespan of fiberglass trays typically ranges from 15 to 20 years. They are highly resistant to corrosion, especially in environments like sewage treatment plants, chemical processing facilities, and offshore oil rigs. Understanding the durability of different cable tray materials is essential for choosing the best solution for your project. What Affects Cable Tray Service Life?

Lots of things can change how long a cable tray lasts. A rung spacing of 6 to 9 inches (150 to 230 mm) is preferable when the cable tray is used for instrumentation and control applications that require additional protection to support and protect numerous small. CER has been producing cable trays, cable ducts, floor boxes and wire mesh trays for the Canadian market for over 30 years. Smaller orders and stock items ship the same day. How?

For one, we sell directly to you - no middle man.
