

Channel-type cable tray partition

Overview

A Channel Cable Tray is a compact, one-piece, U-shaped support system, typically 1-3/4" deep, designed to carry a single power cable or multiple smaller cables like instrumentation, data, and control wires. It's the go-to solution for precise, point-to-point cable routing. These decisions are relatively simple and can be condensed down to four steps. Material choice T&B channel tray systems are fabricated from a corrosion-resistant metal (low-carbon steel, stainless steel or an aluminum alloy) or from a metal with a corrosion-resistant finish (zinc or epoxy). Each cable tray type performs a different function and comes in various materials such as aluminum, galvanized steel, and FRP. Some firms have developed a. ble File Formats Welcome to the CAD Library.
