

Comparison of prices for China Unicom fiber optic routers

AI Overview

China Unicom fiber optic routers range from approximately ¥200 to ¥1,500 depending on model and features. GPON Fiber Optic Modems China Unicom offers several GPON optical fiber modems suitable for home and small office use, including models 8540, 8340, 8240f, and 8346m. These devices support the GPON standard, built-in gigabit LAN ports, and dual-band Wi-Fi. The 8346m is recommended for its strong Wi-Fi penetration and stability, while the 8540 offers richer functions but may require flashing for setup. Prices for these GPON routers typically range from ¥200 to ¥500, depending on the model and vendor. 5G CPE Routers For higher-speed wireless broadband, China Unicom provides 5G CPE routers such as VN007 and VN009. These routers support 5G NSA/SA dual-mode, full-frequency 5G bands, and Wi-Fi 6 for full-house coverage. The VN007 can deliver theoretical download speeds up to 2.3 Gbps and is suitable for enterprise, campus, or home ultra-broadband applications. The VN009 is a newer model with Wi-Fi 6 and 5G dual-mode support. Prices for these 5G CPE routers generally range from ¥1,000 to ¥1,500, depending on specifications and purchase channel. Purchasing Options Wholesale or bulk purchases can reduce unit costs, especially for GPON routers, with factory-direct options available through platforms like Alibaba or Made-in-China. Retail purchases are available through e-commerce platforms such as Taobao or eBay, often including warranty and support. When selecting a router, consider coverage area, number of devices, and compatibility with China Unicom services. For small homes, a single GPON modem may suffice, while larger areas may benefit from additional wireless routers. In summary, China Unicom fiber optic routers are available across a wide price range, from budget-friendly GPON modems around ¥200 to high-performance 5G CPE rout...
