

Core switch cannot recognize IP address

Overview

Here are some solutions to resolve the issue of a switch not finding an IP address:
Check the Router's DHCP Server: Verify that the router's DHCP server is enabled and responding to requests. Restart the Router and Switch: Restarting the router and switch can often resolve the issue. But from yesterday many users (LAN and Wifi) are facing issue as they are getting disconnected from network due to not getting any ip via DHCP from core switch. When static ip is given there is no issue. Make sure that is reflected in your config: 11-26-2021 12:14 AM - last edited on 11-27-2021 11:50 PM by Translator Hello, not sure if this is a typo ?

According to your configuration, the WAN. The Router is set to use the wrong interface for the NAT overload. It is. Quickly learn how to find a switch IP address! This guide provides multiple, easy-to-follow methods for discovering the IP address of your network switch, ensuring smooth network management and troubleshooting.
