

Custom-made fireproof cable trays in Australia

AI Overview

Australian manufacturers like EzyStrut, Ozstrut, and Trafalgar Fire offer custom-designed fireproof cable trays and fire-rated cable support systems for industrial, commercial, and infrastructure projects. Leading Manufacturers and Their Offerings EzyStrut is a pioneer in fire-rated cable support systems in Australia, offering over a thousand certified options and the capability to design custom solutions to meet specific project requirements. Their products include ladder trays, solid-bottom trays, and wire mesh trays, all engineered for durability, compliance, and harsh environmental conditions. EzyStrut's fire-rated solutions are suitable for sectors such as mining, telecommunications, and construction, where both safety and flexibility are critical. Ozstrut provides fire-rated cable trays designed to maintain circuit integrity during fire events. Their T3 Series supports both light and heavy-duty applications, offering modular configurations for easy installation and long-term reliability. These trays are corrosion-resistant and tested to ensure compliance with Australian fire safety standards, making them ideal for data centres, hospitals, and high-risk facilities. Trafalgar Fire specializes in cable fireproofing systems, offering two main strategies: one to prevent vertical or horizontal flame spread along cables, and another to maintain continuous operational circuit integrity for non-fire-rated cables exposed to fire. Their systems, such as FyreWrap® and FyreBOX™, are designed for industrial applications and come with FM Approvals, ensuring compliance with stringent safety regulations. Benefits of Choosing Australian Manufacturers Customization: Local manufacturers can tailor cable trays to specific load requirements, dimensions, and fire ratings. Compliance and Certification: Products are tested to meet Australian standards for fire safety and circuit integrity...
