Dimensions and Specifications of Vertical Cable Trays for Fire Protection

Overview

The vertical cable ladders STL, STM and STIC meet the exact specifications and definitions of DIN 4102 Part 12 of November 1998, such as height of the cableladder / tray, width of the cable ladder/ tray, proportion of holes in the cable tray, distance. The vertical cable ladders STL, STM and STIC meet the exact specifications and definitions of DIN 4102 Part 12 of November 1998, such as height of the cableladder / tray, width of the cable ladder/ tray, proportion of holes in the cable tray, distance. “Cable tray dimensions” sounds simple, but in real projects it is one of the most misunderstood topics in cable management. Many users focus only on tray width, assuming that a wider tray automatically means higher capacity. In practice, cable tray dimensions are a system of interrelated.
