

Does the Xiaomi Mi 3A router support 100Mbps fiber optic internet

Overview

Fibre-optic full gigabit for high-speed broadband over 100Mbps The Xiaomi Router AC1200 includes one gigabit WAN port and two gigabit LAN ports, easily achieving network speeds of 100Mbps and above. Compared with 100-megabit ports, it allows you to better utilise. Mi 3A has two simultaneous bands with Wi-Fi AC. The first is the traditional 2.4GHz which guarantees compatibility with most current and old devices. In this band a maximum transfer rate of 300Mbps is available. The second band of 5GHz is focused to give connectivity to the most modern devices. One of the most affordable models of branded stationary dual-band wireless routers of the AC1200 class with support for the Wi-Fi 5 standard. I found a factory partition dump of another 3A router, with SN and MAC close to mine. I tried to restore the original Xiaomi firmware, with the similar results: I conclude that probably or the MT7612EN chip or the PCI bus has some hardware problem. Will the 300 mHz in between affect it much?
