

Fiber Optic Transceiver SC Single-fiber Bidirectional

Overview

This BiDi transceiver is designed for legacy networking using the SC cabling system. With the SC SFP, users can connect to the corresponding LC SFP using a simple SC-LC patch cable. Optcore offers a wide range of SC SFP BiDi. BiDi SFP (Bidirectional Small Form-Factor Pluggable) transceivers have emerged as a powerful solution, enabling full-duplex communication over a single optical fiber. By using Wavelength Division Multiplexing (WDM), BiDi SFP modules transmit and receive data on two different wavelengths, cutting. BiDi transceiver, a compact optical transceiver with WDM (wavelength division multiplexing) technology and SFP multi-source protocol (MSA) compliance, allows fast data transmission using a single fiber optic for both sending and receiving signals, saving resources and cutting infrastructure costs.
