

Fiber optic router upgrade cannot be used

Overview

In this guide, we'll explain router compatibility, setup steps and whether upgrading your router is necessary to maximize fiber speeds. Key Takeaways: Yes, you can use your own router with fiber internet, as long as it has a Gigabit Ethernet WAN port to connect to your ISP's Optical Network. Fiber optic internet represents a significant leap in internet technology, utilizing thin strands of glass or plastic to transmit data as pulses of light. This method offers vastly superior speeds, lower latency, and greater reliability compared to traditional copper-based technologies like DSL and. Here is the topic's answer before we get into the details: yes, you can absolutely use a normal router with a fiber optic internet connection. In fact, the overwhelming majority of fiber internet customers around the world do exactly that — they keep using a standard Wi-Fi router they already own. Upgrading to Fiber with my ISP. but still retaining control of my network?

I recently talked to my ISP and was asking about fiber when I realized that on coax I bought my own modem that was very highly reviewed. When I enter the IP address of the mesh network (192. It is still doing router stuff.
