

Fireproof sealant for horizontal cable trays

Overview

Four-component intumescent system is ideal for firestopping larger penetrations such as cable trays and conduit. Forms effective intermittent fire-break within horizontal and vertical cable tray runs. Hard char material tightly seals penetrations against flame. Four-component intumescent system is ideal for firestopping larger penetrations such as cable trays and conduit. Forms effective intermittent fire-break within horizontal and vertical cable tray runs. Hard char material tightly seals penetrations against flame. Avoid cable fires and stop them safely! KBS[®] offers various solutions to effectively protect cable penetrations from the passage of flames and smoke. In most cases, the task is to seal off complex cable systems and cables on support constructions. However, individual cables and cable bundles as. 3M Fire Barrier Moldable Putty+ is a one-part, halogen-free product designed to firestop electrical outlet boxes and a wide variety of through-penetrations including cable, conduit, insulated pipe and metal pipe, which penetrate fire-rated construction. 7 products are successfully used to protect cables in high-rise buildings, industrial buildings, and offshore facilities as well as in sensitive areas, such as hospitals, airports, production. Electrical cable tray wall penetration firestopping Scope: Firestopping for busway, cable trays, cables, and trunking passing through walls in enclosed electrical installations. Where cables pass through shafts, walls, slabs, or enter electrical panels or cabinets, openings shall be tightly sealed. AF BAGS are intumescent and ablative fireproof pillows certified under EN 1366-3 for sealing up to EI 240 of cable tray penetrations.
