FTTH Outdoor Drop Cable G657A1, G657B, G652D, single mold drop fiber optical cable The fibers, 250µm, are positioned in a loose tube made of a high modulus plastic. The tubes are filled with a water-resistant filling compound. A1 compliant fibers have the lowest attenuation, perfect fiber geometry, and tight fiber diameter tolerances, making them perfectly suited for the system demands in LAN networks. 657A bend-insensitive fiber for FTTH last-mile deployment. Two parallel FRP strength members ensure good performance of crush resistance to protect the fiber, and reduces the weight of the fiber optic cable. 0 mm phosphated. FTTH drop cable (also called fiber drop wire or subscriber drop fiber) is a small-diameter, single-fiber or 2-fiber outdoor-rated cable designed for the final segment of an FTTH network — from the optical network terminal (ONT) closure or splitter box on the pole/building to the subscriber. This cable is a stranded micro loose tube cable with optical fibre placed inside robust buffer tubes stranded around a fibre reinforced plastic (FRP) central strength member. In addition to optical fibres, the buffer tubes contain water blocking gel and the cable core is surrounded with.
