

High Voltage Busbar 606

Overview

Our HV Busbars provide a reliable solution for compact high-voltage power distribution. With high conductivity and a robust design, they deliver maximum performance in minimal space - efficient, future-proof, and built to last. In cooperation with the customer, these can also feature TE's Bus Bar Insulation Tubing (BBIT). Material Thickness: up to 6 mm Dominik Mittermeier is your Contact for. 6060 aluminum busbar is an electrical conductor made from 6060 alloy, belonging to the 6000 series (AlMgSi alloy). The superior adhesion ensures further processing without wrinkling or cracking of the corresponding layer for continuous high voltages of > 1,000V. One of the signature products developed by Intercable Automotive Solutions are our custom made high-voltage busbars manufactured to client specifications. Busbars are essential components in electric vehicles (EVs), which are increasingly cornering the automotive market worldwide. Circuits can be added and removed easily as they are located just above their respective racks.
