

Household Distribution Box Set Quota

AI Overview

A household distribution box set quota is a system for allocating the total requirement of distribution boxes among multiple suppliers or production units to ensure fair, efficient, and balanced distribution. What is a Quota Arrangement? A quota arrangement is a method used to divide the total requirement of a material—such as household distribution boxes—among different sources of supply, including vendors or internal production lines. Each source is assigned a quota, which specifies the portion of the total requirement it is responsible for supplying over a defined period. This ensures that no single supplier is overburdened and that procurement or production is balanced.

Key Components

- Quota Base Quantity:** The total quantity considered for allocation, often based on historical orders or projected demand.
- Quota:** The percentage or quantity assigned to each supplier or production unit, determining their share of the total requirement.
- Validity Period:** The timeframe during which the quota arrangement is active, ensuring allocations are updated periodically.
- Source List:** A maintained list of approved suppliers or production lines eligible for allocation.

Benefits

- Fair Distribution:** Ensures balanced workload among suppliers or production units.
- Risk Mitigation:** Reduces dependency on a single supplier, minimizing supply disruptions.
- Optimized Planning:** Integrates with Material Requirements Planning (MRP) to automate procurement proposals according to quotas.
- Strategic Sourcing:** Allows prioritization of suppliers based on cost, quality, or reliability.

Setting Up a Quota Arrangement

- Material Master Setup:** Activate the quota arrangement checkbox in the material master (MRP 4 view) and maintain the source list.
- Define Sources:** Specify vendors or internal production lines and assign allocated quantities or percentages.
- Quota Maintenance:** Use transaction codes (e.g., MEQ1 in SAP) to define quotas for each source within the chosen period.
- Integration with Planning:** During MRP runs, the system automatically distributes procurement propo...
