

How much does a distribution box cable cost

AI Overview

Distribution boxes typically range from \$50 to over \$2,000 depending on type and features, while cable boxes generally cost between \$20 and \$100. Distribution Box Pricing The cost of a distribution box varies widely based on material, capacity, and features. Basic residential units, often made of plastic or standard steel, can start around \$50 to \$200. More robust commercial or industrial boxes, made from stainless steel or equipped with advanced components like circuit breakers, surge protectors, and smart monitoring systems, can range from \$500 to over \$2,000. Outdoor or weatherproof boxes generally carry a premium due to enhanced durability and IP protection ratings. Additional factors affecting price include: Voltage and amperage capacity Number of circuits Integrated safety features Customization options (mounting, labeling, or building management integration) Energy efficiency and monitoring capabilities High-quality distribution boxes also offer better cable management, EMI shielding, and easier maintenance, which can justify higher upfront costs. Cable Box Pricing A cable box, used for organizing and protecting electrical or communication cables, is generally less expensive. Standard models for residential or small commercial use are available for \$20 to \$100 on platforms like Amazon. Prices vary depending on: Size and number of ports Material quality (plastic vs. metal) Indoor or outdoor suitability Additional features like lockable covers or modular compartments Summary Residential distribution box: \$50-\$500 Commercial/industrial distribution box: \$500-\$2,000+ Cable box: \$20-\$100 When budgeting, consider not only the purchase price but also installation, maintenance, and long-term operational costs, especially for larger or smart distribution systems.
