

How much does a meter of mesh cable tray usually cost

AI Overview

A meter of wire mesh (basket) cable tray typically costs between \$2 and \$15, depending on material, coating, and supplier. Price Range and Material Factors Wire mesh cable trays, also known as basket trays, are among the most affordable cable tray types due to their lightweight construction and ease of installation. The cost per meter varies based on:

- Material:**
 - Pre-galvanized steel: cheapest option, suitable for dry indoor environments like offices or data centers.
 - Hot-dip galvanized steel: more durable, ideal for outdoor or industrial settings, slightly higher cost.
 - Aluminum: lightweight and corrosion-resistant, generally more expensive than steel.
 - Stainless steel: highest durability and corrosion resistance, used in harsh or hygienic environments, most costly.
- Coating and finish:** Pre-galvanized trays are cheaper, while hot-dip galvanization or powder coating increases the price due to enhanced corrosion protection.
- Size and design:** Standard mesh trays are lighter and easier to cut or bend, reducing labor costs. Larger or heavier-duty trays may cost more per meter.

Typical Cost Estimates

- Wire mesh trays: \$2–\$15 per meter for standard indoor applications.
- Steel ladder trays: \$5–\$25 per meter depending on size and finish.
- Aluminum trays: \$6–\$30 per meter.
- Stainless steel trays: \$20–\$100 per meter for high-demand environments.

Bulk orders or project-scale purchases can reduce the per-meter cost, and labor, supports, and connectors may add to the total installation cost.

Summary

For lightweight, indoor data center or office installations, a wire mesh cable tray will generally cost \$2–\$15 per meter, making it a cost-effective solution compared to ladder or solid-bottom trays. Material choice, environmental exposure, and project scale are the main factors influencing the final price.
