

How to bend a horizontal cable tray

Overview

You can buy a manufactured 90 degree bend or make one on a cable tray bending machine but in this video I show you how to make one using a metal bar. Since the jaws of the bolt cutter drags a layer of zinc across the cut end and forms a protective layer. The first step in preparing the. The first step is to mark out the tray (A). Construction of a flat 90° bend (A) The amount of tray lip to be removed is equal to $2 \frac{3}{4}$ the width of the tray, half of this measurement will be removed on either side of the centre line. To remove the lip we can use a small hand grinder (B) or a file. How to calculate size of cut-out section (D) for a pre-determined angle set Eg. These arrangements can be created by using our standard cable tray sections and removing specific pieces as directed using the Cutter tool (WR-TRAYCTR65), and then bending and securing the tray pieces together using Couplers (WR-CPLKK34), Corner Strength Bars (WR-CNRSBAR-EZ).
