

How to change ports on a core switch

Overview

On the Switching > Monitor > Switch Ports page, administrators can name ports, turn ports on/off, enable spanning tree (RSTP), define port types (access/trunk), and specify VLANs (data and voice). I am looking for some guidance on how to configure a server port on our core switch. For some options, I was thinking this: Option A no switchport no ip address Option B switchport switchport access switchport access vlan 105 or does this accomplish the same thing?
