

How to identify the position of the pigtail reel

Overview

The reel seat is generally located near the bottom of the rod handle. This is typically on the left side for left-handed anglers and the right side. Balance Point Rule: After mounting the reel, hold the rod at the reel seat. A well-balanced rod should feel nearly neutral — not tip-heavy or butt-heavy. Adjust seat position forward or back by 1-2 inches to achieve true balance for less fatigue. Spool the line onto the reel by threading it through the rod guides. View the airport panel for your chosen airport by clicking on the blue airport icons on the map or by searching directly in the search bar. Choose from thousands of airports globally. Access more information and data with expanded sections and added customization. Includes detailed disruption. Regardless of the reel type, several key components are present across most fishing reels: Reel Body/Housing: This sturdy shell encases and protects the reel's internal mechanisms.
