

How to straighten the fiber optic cable for a router

Overview

Inspect the fiber-optic cable by following it along its length. Look for bends in the cable, which obstruct the cable's optical fibers. Gently straighten any unnecessary bends. Remove any objects resting on top of, or otherwise putting pressure on, the cable. This wikiHow article will teach you how to splice a cut fiber optic cable back together with a fiber optic stripper and cutter and a fiber optic crimper. You can't just tape it up like a regular wire. Therefore, precision is everything. Let's dive into the most frequent headaches, how to spot them, and, most importantly, how to get your network back on track. Clean the fiber ends to. Most damage to your optical fibers can actually be repaired in your own home with a little patience and a few tools, including a red laser pen (visual fault locator), an alcohol wipe, and a cleanly cut segment of fiber optic.
