

Huijue Network Port Fiber Optic Panel

AI Overview

Huijue Network Port Fiber Optic Panels are high-quality distribution and patch panels designed for FTTH networks, providing organized fiber management, storage, and fusion capabilities. Overview Huijue Network, established in 2002, is a high-tech provider of network communication equipment, integrating R&D, production, and sales. Their products are widely used by major operators such as China Mobile, China Unicom, China Telecom, and China Tower, and are exported globally to Europe, North America, and Southeast Asia. The company specializes in fiber optic components, outdoor cabinets, and integrated network solutions. Fiber Optic Panel

Features Application: Designed for FTTH (Fiber to the Home) networks, these panels serve as user wiring equipment, enabling efficient fiber organization, storage, and fusion.

Capacity: Panels are available in various core configurations, such as 2-core ABS models, suitable for small to medium-scale deployments.

Material and Protection: Panels are typically made from durable ABS or aluminum alloy, providing protection against environmental factors and ensuring long-term reliability.

Integration: They can be combined with optical fiber adapters, flanges, and cables (single-mode or multi-mode) to create a complete fiber management system.

Advantages Efficient Fiber Management: Keeps fibers organized and reduces signal loss during fusion and connection.

Scalability: Supports expansion of fiber networks with modular design.

Compatibility: Works with a wide range of optical cables and connectors, including G.652 and G.657 standards.

Durability: Designed for both indoor and outdoor use, often meeting IP65/IP66 protection standards.

Related Products Huijue also provides complementary equipment such as:

Outdoor Cabinets: For housing fiber panels and other network devices, with IP66 EMC protection and air-con cooling options.

Optical Splitter Boxes: For distributing optical signals efficiently across multiple endpoints.

Patch Panels and Distribution Boxes: For centralized fiber...
