

Id1 optical module

Overview

0 Iris Diaphragm uses 14 leaves to provide a continuously variable 1.5 to 25 mm aperture for applications including setting the numerical aperture of a lens, controlling or measuring the intensity of a diffuse beam, or approximating beam diameters. The Elyctis ID box ID1 series offers motionless electronic document verification, combining MRZ scanner, ISO 14443 contactless reader and, depending on the model, ISO 7816 chip card reader and fingerprint sensor. Magnesium-alloy construction provides excellent mechanical characteristics for stiffness, thermal properties, vibrational dampening and reduced weight. Tightly sealed and desiccated optical bench protects internal components from high humidity and aggressive chemicals. Internal diagnostics with. The ID-1. This revolutionary ID scanner offers impressive forensic image resolution of up to 1,300 dpi, with rapid results and optimal functionality. In certain cases, SSI may allow the buyer to use their own.
