

Incoming Inspection Standards for Distribution Boxes

Overview

Section 1: Receiving General The shipper/receiver will: 1. 1 Inspect all incoming trucks for the following: □ The trucks must be covered and closed. □ Floorboards are dry and clean. Incoming inspection means checking all materials, parts or products as soon as they arrive at your manufacturing facility — before they go to production or stock. The purpose of incoming inspection is to: Verify quantity and integrity of delivered purchased raw materials. By verifying that raw materials, parts, and components meet specifications the moment they arrive, organizations protect themselves from. TLDR: Protect your inventory & avoid costly returns with this free Daily Receiving Inspection Checklist template! It guides your team to thoroughly check incoming shipments for damage and condition - from packaging to internal product quality - ensuring a smooth receiving process and minimizing. Incoming quality inspection (or incoming quality control) is a pre-defined process, aiming to ensure that no defective raw materials, sub-assemblies or parts reach the manufacturing line of the customer. Thus, it focuses on the qualification of raw materials and supplied parts from the customer's.
