

Indian optical module manufacturing plant

Overview

NEW DELHI – In a landmark move for India's high-tech manufacturing sector, Dutch connectivity leader GX Group has announced an investment of ₹500 crore to establish the country's first manufacturing facility for indigenous photonics modules and chip systems. The India Semiconductor Mission (ISM) aims to build a strong semiconductor and display ecosystem, positioning India as a global hub for electronics manufacturing and design, while serving as the nodal agency for the efficient and seamless implementation of semiconductor and display schemes. Founded in 1985 and headquartered in Bangalore, Optics and Allied Engineering Pvt. With a state-of-the-art 60,000 sq. facility dedicated to advanced fabrication, glass machining, opto-mechanical assembly, and. Launched in 2021, ISM 1.0 was conceived as a state-backed push to build a full-stack chip ecosystem. Our expertise is in the manufacture of custom precision optical instruments, devices and components besides assemblies, sub assemblies, etc.
