

Indoor Cable Tray Laying Scheme

Overview

In this post, we will see together how to install cable tray on-site. Firstly, we need an approved shop drawing that shows the cable tray route, its dimensions, installation height, support system, the number of layers of these trays, and the type of systems they will serve. Our knowledgeable production team works closely with each customer to provide quality solutions based on your schedule and budget. It ensures that all installation activities follow authorized plans, specifications, and standards. This guide covers the critical steps, from selecting the right electrical cable tray and performing accurate cable fill. This method statement covers the site installation of the cable tray & ladders and the requirements of checks to be carried out.
