

Integrated power cabinet NEMA4X landed price

AI Overview

The landed price of a NEMA 4X integrated power cabinet typically ranges from \$500 to \$3,000 or more per unit, depending on size, material, customization, and shipping. Factors Affecting Landed Price

- Product Specifications:** NEMA 4X enclosures are designed for outdoor use and provide corrosion and weather resistance. Prices vary based on material (stainless steel, fiberglass, or polycarbonate), size, and features such as hinged doors, swing-out panels, or internal mounting options. Standard small enclosures may start around \$500–\$800, while larger or custom cabinets can exceed \$2,000–\$3,000.
- Customization and OEM Requirements:** Custom enclosures with specific dimensions, passivation, electro-polishing, or silk-screening services increase costs. Bulk orders often reduce per-unit pricing, while one-off custom units are more expensive.
- Shipping and Import Costs:** The landed price includes freight, insurance, customs duties, and taxes. Shipping from China or other international suppliers can add \$100–\$500 per unit depending on size, weight, and shipping method. Expedited shipping or air freight increases costs significantly.
- Supplier and Location:** Suppliers like DigiKey, McMaster-Carr, and NemaEnclosures offer in-stock and ready-to-ship options, which may reduce lead time but slightly increase unit cost. Direct factory sourcing from China may lower the base price but adds shipping and import considerations.

Estimating Landed Price

For a mid-sized stainless steel NEMA 4X integrated power cabinet (approx. 24"x24"x12"):

- Base unit price: \$800–\$1,200
- Shipping & insurance: \$150–\$300
- Import duties & taxes (varies by country, ~5–10%): \$50–\$120
- Estimated landed price: \$1,000–\$1,600 per unit

For larger or fully customized cabinets, the landed price can reach \$2,500–\$3,500 per unit.
