

Invisible patch cord for private power grid resistant to low temperatures

Overview

Cryogenic cables are specially designed electrical cables that function effectively at extremely low temperatures, down to -273°C (-459°F). Whether you're preparing for cold weather or that your applications are operating in a cold environment, TPC understands that having a cable that can keep up with your operations in the most extreme climates can be a competitive advantage. Our cold temperature cables can perform as low as -70°F . TPC has a wide variety of cable materials and configurations to suit every industrial application, including extreme cold. Suitability: For use both internally and externally. Standards & Voltage Rating: BS6004. Flame Retardant to IEC/EN 60332-1-2. The Pomona 5291A is a Banana Plug, Single, Sheathed - Retractable To Banana Plug, Single, Sheathed - Retractable Patch Cord on a 24. Available in red and black with 24" and 60" cable lengths. UK Fast Tracked (1-3 days)
