

Iraq Pipeline Optical Cable

Overview

The Silk Route Transit is a fibre-optic terrestrial cable across Iraq, over 3500 kilometres. It is owned and operated by iQ Group, a leading Iraqi fiber optic provider founded in 2005. hyperscalers secure “dark fiber” capacity along Iraqi land route to reduce latency and provide a backup to vulnerable subsea cables. When drones hit Amazon's Gulf data centers in March, banking and payment apps went down. An Iraqi telecom built a fiber route alongside oil pipelines that has. The Silk Road, an ancient network of trade routes, facilitated the exchange of goods and ideas between the East and West for more than 1,500 years. Based in Sulaymaniyah, Iraq, iQ. iQ proudly announces the most strategic fibre optic project in Iraq and the region: The Silk Route Transit. A previous data route through Syria worked until. Internet speeds for subscribers on fibre-to-the-home (FTTH) networks are to be increased by 20% at no additional cost, following an agreement reached between the ministry and private-sector operators. Communications Minister Mustafa Jabbar Sanad convened an expanded meeting with senior ministry.
