

KVM switcher discovered by the company

Overview

Switches to connect multiple computers to one or more peripherals have had multiple names. The earliest name was Keyboard Video Switch (KVS). With the advent of the mouse, the Keyboard, Video and Mouse (KVM) switch became popular. The name was introduced by Remigius Shatas, the founder of Cybex (now), a peripheral switch manufacturer, in 1995. Some companies call their switches Keyboard, Video, Mouse and Peripheral (KVMP).

AI Overview

The Comprehensive CSW-HC12KVMC is a newly launched 2x1 4K HDMI/USB-C KVM switcher designed for flexible control of multiple computers with a single keyboard, video, and mouse setup. Overview The CSW-HC12KVMC by Comprehensive Connectivity Company is part of their Integrator Series™ and is designed for professional AV and IT environments where users need to switch between two host computers efficiently. It supports 4K resolution at 60Hz with full 4:4:4 color and 8-bit depth, ensuring high-quality video output for demanding applications. Key Features Multiple Input Options: HDMI and USB-C input ports, with an additional USB-C port for power delivery up to 100W. USB 3.2 Hub: Supports data transfer up to 5Gbps, allowing peripherals to be shared between connected computers. Audio Extraction: Enables separate audio output for enhanced multimedia management. Control Methods: Users can switch between computers via front panel buttons, IR remote, or hotkeys through a connected keyboard/mouse. Virtual Interaction: Automatically wakes a connected PC from standby mode, reducing switching delays. Single-Cable Convenience: USB-C allows video, audio, data, and power to travel through one cable, simplifying workstation setup. Applications This KVM switch is ideal for environments such as: Corporate offices where multiple computers need to be accessed from a sin...
