

Laos Distribution Box Specifications Table

AI Overview

Laos distribution boxes come in various types, including plastic modular boxes, PDU power strips, and prefabricated substation boxes, with specifications covering dimensions, voltage ratings, materials, and compliance standards.

1. Plastic Distribution Boxes (MB-ABC Series) These boxes are widely used in residential, commercial, and industrial applications. They are made of flame-resistant ABS plastic and comply with BS EN60439-3 and JB/T7121-93 standards.

Type	Length (mm)	Width (mm)	Height (mm)	Features
MB-ABC500	200	174	95	Flush-mounted, modular, flame-proof, impulse-proof
MB-ABC700	255	172	95	Modular combination equipment installation
MB-ABC900	328	172	95	Suitable for AC 50Hz, 220V/380V circuits

These boxes are suitable for homes, high-rise buildings, hospitals, airports, and commercial facilities and support modular combination equipment installation.

2. Laos PDU Power Distribution Units Laos PDUs and power strips are designed for surface mount, rack mount, and general-purpose applications. They are manufactured according to Laos standards with agency approvals and are suitable for data centers, server rooms, and industrial applications. These units provide multiple outlets and are available for standard duty to industrial duty applications.

3. YBF Series Wind Power Box-type Substation For high-voltage applications, the YBF series box-type substation is used in wind power generation. Key specifications include:

- Voltage Transformation:** Steps up 0.69kV from wind turbines to 35kV for transmission.
- Components:** High-voltage switchgear (XGN-40.5), low-voltage switchgear, booster transformer, auxiliary equipment.
- Materials:** High-quality steel plates with anti-corrosion treatment, insulation materials; optional anodized aluminum or color steel composite panels.
- Standards Compliance:** GB/T17467-2020 for prefabricated substations.

Lao PDR Electric Power Standards Guide | PDF | Electric Power

This document provides standards for hydropower civil engineering facilities and electrical technical standards in Laos. It was initially developed in 2004 with support from Japan, and was revised in

Data Collection Survey On Improvement Of Power System Operation In Laos ...

However, at present, although synchronous interconnection is being carried out only with Thailand, the Laos domestic power system does not reliably perform supply and demand adjustment to match

LEPTS: Lao PDR Electric Power Standards | PDF | Electric Power

This document provides an overview and list of contributors for updated electric power technical standards in Laos. It discusses how earlier standards from 2004 needed updating to address new

TECHNICAL SPECIFICATION I.R.O. 63,100,160 & 315 KVA

1. SCOPE: This Specification covers the design, manufacture, testing at works and supply of Distribution Boxes made out of CRCA MS for controlling the L.T. feeders from the L.T. side of Distribution

Talking About The Installation Specification Of

The structure and simple circuit of the distribution box make the application of the distribution box more and more widely, also promote a variety of additional

DISTRIBUTION BOARDS CATALOG

Unique box wrapper profile developed using latest technologies and simulation software ensures the strongest resistance to high crushing forces. This profile helps in preventing the twisting of the box

25/63/100 KVA LT Distribution Box Specs

This document specifies requirements for 25/63/100 KVA low voltage distribution boxes. The boxes will include an incoming disconnect switch and outgoing porcelain fuse units to protect and control low

Final Common technical specifications for 25/63/100 kVA L.T ...

1. Scope: The Specification covers design, manufacturing, factory testing and supply of "L.T. Distribution Boxes" with Switch disconnector and Porcelain Fuse units for protection and control of 25/63/100
