

Latvian Cable Tray Cost Standard Table

AI Overview

Cable tray prices in Latvia typically range from €10 to €80 per meter, depending on material, size, and type. Price Overview In Latvia, cable trays are available in various materials such as stainless steel, hot-dip galvanized steel, aluminum, and plastic, with prices influenced by durability, load capacity, and installation features (). For example: Mesh cable trays (wire trays with integrated couplings) in stainless steel or hot-dip galvanized steel generally start around €10–€25 per meter for smaller dimensions (e.g., 60x60 mm or 60x150 mm) and can reach €50–€80 per meter for larger sizes (e.g., 110x300 mm or 110x400 mm) (). Solid or perforated trays may be slightly more expensive due to higher material usage and structural strength. Plastic or FRP trays are typically used in specialized environments and can vary widely in price depending on fire resistance and chemical durability. Market Context Latvia's cable tray market is competitive, with several local manufacturers and suppliers offering products at industry-leading prices while ensuring durability and compliance with standards (). The market is influenced by: Infrastructure development: Growing construction and industrial projects increase demand for cable management systems (). Material choice: Stainless steel and aluminum command higher prices due to corrosion resistance and longevity. Supplier type: B2B bulk purchases often reduce per-unit costs, while retail or small-scale purchases may be higher. Purchasing Tips Request quotations from multiple suppliers to compare prices and delivery terms. Consider total cost including installation accessories like couplings, brackets, and supports. Check for certifications to ensure compliance with European safety and quality standards. For precise pricing, contacting local suppliers such as Kopos, Cable House, or RS Latvia is recommended, as they can provide updated quotes based on specific dimensions, materials, and order volumes ().
