

Lc-lc fiber coupler

AI Overview

An LC to LC fiber coupler connects two LC fiber optic cables, supporting both singlemode and multimode applications, and can be used in duplex or simplex configurations. Overview An LC to LC fiber coupler is a female-to-female adapter that links two LC-terminated fiber optic cables, allowing you to extend the length of a fiber network or connect cables through a wall plate or patch panel. These couplers maintain signal integrity with low insertion loss and are designed for precise fiber alignment using ceramic-lined inner sleeves. Types and Applications Singlemode vs Multimode: LC couplers support singlemode (OS1/OS2, 9/125 μ m) and multimode (OM1/OM2/OM3/OM4/OM5, 50/125 μ m or 62.5/125 μ m) fiber cables. Singlemode is typically used for long-distance connections, while multimode is suitable for shorter distances. Duplex vs Simplex: Duplex couplers connect two fibers simultaneously, ideal for bidirectional communication, whereas simplex couplers connect a single fiber. Keystone and Wall Plate Mounting: Many LC to LC couplers are designed to snap into keystone patch panels or wall plates, providing a clean and organized installation without additional tools. Key Features Low Insertion Loss: Ensures minimal signal degradation over extended cable runs. Durable Construction: Typically features ABS housing and ceramic sleeves for long-lasting reliability. Compatibility: Works with LC/UPC polished fiber ends and supports both simplex and duplex cable assemblies. Ease of Installation: Can be installed in keystone jacks, patch panels, or wall plates without specialized tools. Use Cases Extending fiber optic cable runs in data centers or office networks. Connecting fiber cables through walls or panels for structured cabling. Linking singlemode or multimode LC cables in telecom, enterprise, or industrial networks. LC to LC fiber couplers are widely available from vendors like StarTech, Eaton, and Fibercables Direct, offering options for both singlemode and multimode, as well as duplex or simplex configurations.
