

Lebanon handheld light source incident blind zone 1m

Overview

Background/Aims On 17 September 2024, over 3000 pager devices containing explosives were remotely detonated across Lebanon in a coordinated mass-casualty event, causing unprecedented ocular trauma. This study aims to characterise the nature and extent of ophthalmic injuries treated at a tertiary. The next day larger explosions of handheld radios took place throughout the country. One walkie-talkie exploded at a crowded funeral for four victims of the previous day's pager attack, including an 11-year-old child and a nurse. The attack wounded many operatives with. In Beirut's southern suburbs, the remains of exploded pagers used by Hezbollah on display at an undisclosed location, on September 18, 2024, in a stealth attack blamed on Israel. (AFP) Zainab Mustarah once spent her days running an events planning firm in Beirut. But for the last year, she has been.
