

Mobile Level 3 Power Distribution Box Socket

AI Overview

A Mobile Level 3 Power Distribution Box Socket is a portable, high-safety electrical distribution unit designed for industrial, construction, and outdoor applications, offering multiple socket configurations, circuit protection, and robust environmental resistance.

Overview Mobile Level 3 power distribution boxes are portable electrical units that allow safe and efficient distribution of power in temporary or mobile setups, such as construction sites, outdoor events, industrial maintenance, and remote operations. They are designed to handle multiple devices simultaneously, including power tools, lighting, and machinery, while providing high safety standards.

Key Features

- Portability:** Equipped with handles or wheels for easy movement across sites.
- Socket Configurations:** Can include multiple outlets, aviation plugs, and two- or three-pole circuit breakers to accommodate various equipment needs.
- Load Capacity:** Typically supports loads ranging from 16A to 125A, suitable for small to heavy-duty equipment.
- Safety Mechanisms:** Integrated Residual Current Devices (RCDs), circuit breakers, surge protection, and leakage protection devices to prevent electric shock and equipment damage.
- Environmental Protection:** High IP ratings (IP44 to IP65) ensure resistance to dust, water, and impact, making them suitable for outdoor and harsh environments.
- Construction Material:** Often made from ABS engineering plastic or high-strength, impact-resistant materials for durability and corrosion resistance.
- Customization:** Many units allow internal configuration adjustments, including socket types, circuit breakers, and protective devices to match specific project requirements.

Applications

- Construction Sites:** Powering tools, lighting, and temporary equipment safely and efficiently.
- Industrial Maintenance:** Mobile units for workshops, factories, and airport maintenance areas.
- Events and Entertainment:** Providing flexible power...
