

Mpo-lc fiber optic patch panel

Overview

An MPO to LC patch panel is a modular fiber enclosure that breaks out a single MPO or MTP trunk cable into multiple LC connections, allowing high-density fiber routing and easier management in structured cabling systems. The panels will enable Cisco's customers to facilitate breakout connectivity agnostic of the data rate. The Cisco[®] solution of panel and cable assemblies offers versatile solution for any breakout. MTP[®] fiber adapter panels pre-loaded with fiber adapters provide a means to connect backbone-to-backbone or backbone-to-horizontal fiber cabling. The US Conec's MTP[®] brand adapters are fully compliant with IEC Standard 61754-7 and TIA 604-5. Spring Optical Communication is one of the largest and best mpo to lc patch panel-sp2 manufacturers and suppliers with rich experience. Our 19-inch rack-mount panels are constructed from .06 cold-rolled steel with durable black powder coat.
