

National Data Center Rack Prices

Overview

Industry reporting on primary North American colocation markets indicates that 250-500 kW deployments were approaching approximately \$196 per kW per month in H2 2025, with larger requirements seeing sharper increases. When it comes to the design of the data center the rack is an incredibly important component since it is the structure that houses and supports many of the servers, storage, and network equipment. It's a function of market, power density, bandwidth model, contract term, and whether the salesperson on the other end of the phone thinks you're a sophisticated buyer or a. Smart racks with monitoring features and DCIM integration are becoming more common, helping teams manage higher IT loads, reduce downtime, and improve day-to-day operations. Labor: 2 hours; Delivery: included; Total: \$650-\$900; data-formula="labor_hours × hourly_rate"> Notes: Suitable for small setups with modest power needs. 95 million in 2020 to USD 1,848. 39% during the forecast period.
