

North Korean Equipment-Type SD-WAN Management Platform

Overview

The “KDDI SD-Network Platform” is an SD-WAN service that enables flexible construction of corporate networks according to work styles, business, and site reviews. Cisco Catalyst SD-WAN Manager (formerly vManage) is a highly customizable dashboard that simplifies and automates the deployment, configuration, management, and operation for Cisco SD-WAN. NTT SD-WAN services transform the way networks are designed and built by leveraging the industry's leading global SD-WAN platform to. Huawei's SD-WAN Solution provides powerful networking, a superior user experience, and simplified O&M capabilities, meeting WAN interconnection requirements of enterprises of all shapes and sizes, as well as carriers and service providers. 5G/wired uplinks enable reliable and scalable. Software-Defined Wide Area Networks (SD-WAN) have emerged as a game-changing solution to meet these demands. Unlock modern, enterprise-grade connectivity, centralized visibility, and flexible management to seamlessly support SaaS tools, cloud applications, and remote users.
