

Philippines Bridge Structure

Overview

The architecture of bridges in the Philippines has dramatically evolved, mirroring the advancements in engineering and technology. Some stand out not just for their length but for their historical significance. The Binondo-Intramuros Bridge is a tied-arch bridge in Manila, Philippines, spanning the Pasig River. It connects Muelle de Binondo in Binondo and San Nicolas to Solana Street and Riverside Drive in Intramuros. The bridge has four lanes and exhibits a steel bowstring arch design with inclined. The List of bridges in the Philippines encompasses the nation's extensive infrastructure of over 26,000 bridges, including approximately 9,007 national bridges managed by the Department of Public Works and Highways (DPWH) and 17,065 local bridges overseen by provincial, city, and municipal. The Macapagal Bridge (Filipino: Tulay ng Macapagal) is a steel cable-stayed bridge that spans the Agusan River in Butuan, Agusan del Norte. It is located on Mayor Democrito D. Plaza II Avenue (also known as the Butuan Bypass Road).

Article Content
