

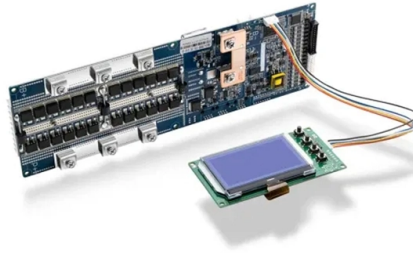

## Photovoltaic combiner box price quote

### AI Overview

A photovoltaic combiner box typically costs between \$220 and \$800 per unit, depending on specifications and protection features.

**Price Ranges**

- Commercial-grade 16-string combiner boxes: \$220–\$480 per unit
- Industrial or enhanced protection models: \$550–\$800 per unit
- Smaller residential or 4–10 string boxes: Prices vary widely, often lower than commercial units, with online listings showing cost-effective options for off-grid or small-scale systems

**Factors Affecting Cost**

- Number of strings or inputs:** More strings increase complexity and cost.
- Protection features:** Overcurrent, overvoltage, surge protection, and DC disconnect switches add to the price.
- Quality and certification:** IEC, UL, or marine-grade IP68 certifications increase reliability and cost.
- Market trends and innovations:** Smart monitoring capabilities are becoming standard, slightly raising prices but improving system efficiency and safety.

**Cost Considerations**

- Combiner boxes typically account for 2.8–4.1% of total PV system costs, making them a small but crucial investment in system safety and efficiency.
- Cheaper units may save upfront costs but could lead to higher maintenance or downtime expenses. Balancing initial cost with long-term reliability is essential.
- Bulk purchases or supplier negotiations can reduce per-unit costs, especially for large-scale installations.

**Summary**

For a typical solar installation, expect to budget \$220–\$800 per combiner box, with the exact price depending on the number of strings, protection features, and quality certifications. Investing in a reliable, certified combiner box ensures safety, efficiency, and long-term system performance.
