

Price List for Galvanized Molded Cable Trays

AI Overview

The price of galvanized cable trays typically ranges from \$2 to \$25 per meter, depending on material, type, size, and finish. Price Range and Factors Galvanized steel is the most common material for molded cable trays, offering a balance of durability and cost. Pre-galvanized trays are generally cheaper, while hot-dipped galvanized (HDG) trays provide superior corrosion resistance and are priced higher. The type of tray—ladder, perforated, or wire mesh—also affects cost, with ladder trays being more expensive due to their load-bearing capacity, and wire mesh trays being more affordable for lightweight applications. Typical Costs Standard galvanized steel cable trays: \$2–\$25 per meter, depending on size and finish. Hot-dipped galvanized ladder trays: Sold in standard lengths of 2.4 meters, with prices varying by supplier and region. Accessories and fittings: Couplers, bends, and lids are priced per piece and can add to the total cost. Additional Considerations Bulk orders can reduce per-meter costs. Installation and shipping may significantly impact the final price, especially for heavy trays. Environmental exposure: Outdoor or corrosive environments justify investing in HDG trays for longevity. Customization: Many manufacturers offer custom sizes and finishes, which can increase cost. For accurate pricing, it is recommended to contact suppliers directly, as costs vary by region, order quantity, and specific project requirements.
