

## Price of FRP Vertical Shaft Cable Trays

### AI Overview

FRP vertical shaft cable trays typically range from \$20 to \$150 per meter, depending on size, type, and supplier. Price Overview The cost of FRP (Fiberglass Reinforced Plastic) vertical shaft cable trays varies based on factors such as tray width, height, load capacity, and environmental resistance. Standard ladder-type or perforated FRP trays are generally priced between \$20 and \$150 per meter for industrial-grade products, with higher prices for heavy-duty or custom designs. Suppliers on platforms like Alibaba and TradeIndia offer competitive pricing, often with discounts for bulk orders. Factors Affecting Price Material Quality: High-quality fiberglass with corrosion-resistant resin increases durability and cost. Tray Type: Ladder, perforated, or solid-bottom trays have different manufacturing costs. Ladder-type trays are commonly used for vertical shafts due to better ventilation and cable support. Dimensions: Wider or taller trays designed for higher cable loads are more expensive. Accessories: Covers, splices, junctions, and support channels add to the total cost. Regional Availability: Prices may vary depending on the supplier's location and shipping costs, especially for GCC, MENA, or Indian markets. Purchasing Tips Compare Suppliers: Check multiple verified suppliers on Alibaba, TradeIndia, and IndiaMART to get the best price and quality. Request Custom Quotes: For vertical shaft installations, provide exact dimensions and load requirements to receive accurate pricing. Consider Standards Compliance: Ensure the FRP trays meet industry standards for fire resistance, UV protection, and mechanical strength, especially for harsh environments like oil, gas, or offshore facilities. By considering these factors, you can select an FRP vertical shaft cable tray that balances cost, durability, and compliance for your specific project needs.
