

Price of North Korean Galvanized Cable Tray

AI Overview

The average export price of cable trays from North Korea is approximately \$206.24 per unit. According to trade data, North Korea exports cable trays at an average price of \$206.24, based on information derived from the US Customs Department. This figure represents general cable tray exports and may vary depending on the type, size, and galvanization method. Galvanized cable trays, which are coated with zinc to resist corrosion, are commonly used in industrial and electrical installations, and their price can be influenced by material quality, thickness, and production process.

Factors Affecting Price

- Material and Coating:** Hot-dip galvanized trays are more durable and slightly more expensive than pre-galvanized trays.
- Size and Load Capacity:** Larger or heavy-duty trays cost more due to increased steel usage.
- Quantity and Bulk Orders:** Prices can decrease for large orders due to economies of scale.
- Shipping and Logistics:** Exporting from North Korea may involve additional costs due to limited trade channels and sanctions.

Regional Comparison

For context, galvanized cable trays in nearby regions like South Korea typically range from \$2 to \$25 per meter, depending on material, type, and finish. While North Korea's export price is listed per unit rather than per meter, it suggests that North Korean trays are competitively priced for international trade, though availability and shipping constraints may affect actual procurement costs. In summary, if you are considering sourcing galvanized cable trays from North Korea, \$206.24 per unit serves as a baseline reference, but final costs will depend on specifications, order size, and logistics.
